

DAVIS COLLEGE OF AGRICULTURE, NATURAL RESOURCES AND DESIGN

DATE: March 22, 2023
TO: 2023 WV Kiko Buck Test Consignors
FROM: Scott A. Bowdridge, WV Buck Test Program Coordinator

Dear Kiko Producers,

Another successful year of the WV Buck Test is in the books! 52 consignors submitted bucks this year coming from over 17 different states, all with an interest of understanding, documenting and evaluating performance of Kiko goats. My staff and I thank you for your continued support of this testing program, which is the largest in the US! Your support is critical for us to be able to offer this program annually.

We started the test with 231 bucks and ended with 218 which is a death loss of 5.6%. While we would all like this number to be 0, that fact that we consistently conduct this test with single digit death loss percentage is a compliment to you as producers for sending us high-quality bucks to test. Second is the extraordinary effort of our veterinary and animal care staff who ensure a high standard of animal care. This is a team effort each year and I think that both groups do an outstanding job.

Data collection and processing would not be possible without the hard work of the graduate students in my lab. These kids work tirelessly to make sure your data are collected and accurately reported. I'd be remiss if I didn't recognize all the hard-work and sacrifice these kids make to ensure the quality of this test.

I know you all have waited patiently, and anxiously, for these data. Please keep a few important points in mind as you sort out this information. First the final index is weighted based on what I think is most important for goats and small ruminants in general, so FEC gets 40% of the final index. Don't forget that the other 60% of the index is split evenly between ADG and REA – thus 60% of the index is on economically important traits. This final index does not tell you that a buck is sound, or phenotypically desirable, just that they performed well on this test. In no way does the ranking of this test imply or certify any of these bucks as potential breeding animals.

With all these things in mind, enjoy sorting through these numbers. Make sure to contact Eric to arrange pickup or sale shipment of your bucks. And please contact me if you have any questions or need further clarification!

We look forward to conducting this test next year and working with this enthusiastic group of producers!
